3.1.10. Detailed Status Acquisition Command.....	7
3.1.11. Write command .....	7
3.1.12. Read Command .....	7

## 1. Overview

This is an outline of sample programming to control LA6-POE via socket communication.

The programs are intended to control the unit using Java control without using the DLLs provided by PATLITE.

### 1.1. System Overview

The system configuration diagram of this program is as follows.

The sample program controls one LA6-POE by socket communication.

## 2. Development environment

The development environment of the sample program is shown below.

Development Environment		Remarks
Development OS	Windows 10 64bit	
Development Language	Java (Adopt Open JDK)	11 or later
Development Tools	Eclipse	2021-06

### 3. Application Overview

#### 3.1. Command Operation

Open Command Prompt, move to where Main.java is located and specify the command line arguments to execute commands for each operation.

##### 3.1.1. Command list

Command Name	Description
Smart Mode Control Commands	Run Smart Mode with the specified group number
Mute Command	Controlling ON/OFF of the alarm during smart mode
STOP/Pulse Input Command	When transmitted during time trigger mode, pattern stop/restart is controlled. When transmitted during pulse trigger mode, pattern transitions.
Operation Control Command	Controls LED unit pattern for each tier and alarm pattern (1 to 3).
Detailed Operation Control Commands	Controls the color and operation pattern for each LED unit tier and alarm pattern (1 to 11).
Clear Command	Turn off LED unit and stop alarm.
Restart Command	Restart LA6-POE
Status Acquisition Command	Used to acquire status of signal lines/contact inputs and the status of the LED unit and alarm.
Detailed Status Acquisition Command	Used to acquire status of signal lines/contact inputs, LED unit and alarm status, and color information for each tier.
Write Command	Controls continuous on and flashing patterns for LED Unit tiers 1-3 and alarm patterns 1 and 2.
Read Command	Used to acquire continuous on and flashing of LED Unit tiers 1-3 and

	alarm patterns 1 and 2.
--	-------------------------

### 3.1.2. Smart Mode Control Commands

Execute command with the following command line arguments

No.	Command Line Argument	Value
1	Command ID	T
2	Group Number	1~15

Example: java Main.java T 1

### 3.1.3. Mute Control Commands

Execute command with the following command line arguments

No.	Command Line Argument	Value
1	Command ID	M
2	Alarm ON/OFF	ON:1, OFF:0

Example: java Main.java M 1

### 3.1.4. STOP/Pulse Input Command

Execute command with the following command line arguments

No.	Command Line Argument	Value
1	Command ID	P
2	STOP Input/Trigger Input	STOP input ON/Trigger input: 1, STOP input: 0

Example: java Main.java P 1

### 3.1.5. Operation Control Commands

Execute command with the following command line arguments

No.	Command Line Argument	Value
1	Command ID	S
2	LED Pattern 1	Off: 0 Continuous On: 1 Flash: 2 No change: 9
3	LED Pattern 2	
4	LED Pattern 3	
5	LED Pattern 4	
6	LED Pattern 5	
7	Alarm Pattern	Stop: 0 Pattern 1: 1 Pattern 2: 2 Alarm Sound when simultaneous alarm input: 3 No change: 9

Example: java Main.java S 1 2 9 0 0 1

## 3.1.6. Detailed Operation Control Commands

Execute command with the following command line arguments

No.	Command Line Argument	Value
1	Command ID	D
2	LED Unit 1	Off: 0
3	LED Unit 2	Red: 1
4	LED Unit 3	Amber: 2
5	LED Unit 4	Lemon: 3
6	LED Unit 5	Green: 4 Sky: 5 Blue: 6 Purple: 7 Pink: 8 White: 9
7	Flashing Operation	Flashing OFF: 0 Flashing ON: 1
8	Alarm Pattern	Stop: 0 Pattern: 1 Pattern: 2 Pattern: 3 Pattern: 4 Pattern: 5 Pattern: 6 Pattern: 7 Pattern: 8 Pattern: 9 Pattern: 10 Pattern: 11

Example: java Main.java D 1 2 3 4 5 1 1

## 3.1.7. Clear Command

Execute command with the following command line arguments

No.	Command Line Argument	Value
1	Command ID	C

Example: java Main.java C

## 3.1.8. Restart Command

Execute command with the following command line arguments

No.	Command Line Argument	Value
-----	-----------------------	-------

1	Command ID	B
2	Password	Password set during password setup in the Web Setup Tool

Example: java Main.java B patlite

### 3.1.9. Status Acquisition Command

Execute command with the following command line arguments

No.	Command Line Argument	Value
1	Command ID	G

Example: java Main.java G

### 3.1.10. Detailed Status Acquisition Command

Execute command with the following command line arguments

No.	Command Line Argument	Value
1	Command ID	E

Example: java Main.java E

### 3.1.11. Write command

Execute command with the following command line arguments

No.	Command Line Argument	Value
1	Command ID	W
2	Operation Data	Bit7: LED tier 3 Flashing (OFF:0, ON:1) Bit6: LED tier 2 Flashing (OFF:0, ON:1) Bit5: LED tier 1 Flashing (OFF:0, ON:1) Bit4: Alarm pattern 2 (OFF:0, ON:1) Bit3: Alarm pattern 1 (OFF:0, ON:1) Bit2: LED tier 3 Continuous On (OFF:0, ON:1) Bit1: LED tier 2 Continuous On (OFF:0, ON:1) Bit0: LED tier 1 Continuous On (OFF:0, ON:1)

Example: java Main.java W 145

→ "LED tier 3 Flashing," "Alarm pattern 2," and "LED tier 1 Continuous On"

### 3.1.12. Read Command

Execute command with the following command line arguments

No.	Command Line Argument	Value
1	Command ID	R

Example: java Main.java R
